

Table 1 Simulation parameters	
Basic parameters	3GPP TS 38.101 Subclause 5.2.4.1.1 Test 5-1
Modified parameters	No precoding, same information bit payload and binary channel bits for every slot
Data type	Floating point
Channel estimation, synchronization and noise power estimate	Perfect
Equalizer type	LMMSE equalizer provided by the platform
LDPC decoder	Layered belief propagation with 12 iterations, $N_{cb}=25344$
